

Special offer: Oral Hygiene PLUS Tongue Cleaner IQ

Oral Hygiene Elixir

The disinfectant properties of the Vivasan Oral Hygiene elixir prevent the formation of an unpleasant mouth odor and refresh the breath. Vivasan Oral Hygiene oral care elixir contains a range of selected pure natural oils. The mixture of oils moistens the mucous membrane and softens it. The tissue of the larynx becomes firmer, thereby normalizing breathing during sleep. This reduces night-time snoring. Ideal when used with our Prevention Toothpaste and the Tongue cleaner IQ.

Tongue Cleaner IQ

The IQ tongue cleaner is a specially developed scraper to clean the tongue. This unique tongue cleaner is equipped with an ergonomic IQ handle with a narrow scraping surface of soft material. This narrow surface ensures an effective and pleasant use. The IQ cleaner removes bacteria and cleans the tongue, even if you drank Red Wine.

Unique and effective

When it comes to fresh breath, a good Tongue cleaner is many times more effective than tongue-brushing or chewing gum. In addition, the tongue cleaner offers other advantages. By scraping the tongue, you get an improved taste and you are better protected against respiratory infections.

Tongue scraping works preventively against caries and reduces snoring partially and often completely.
