

# Tongue cleaner IQ

## Tongue scraper

## Vivasan Webshop

The IQ tongue cleaner is a specially developed scraper to clean the tongue. This unique tongue cleaner is equipped with an ergonomic IQ handle with a narrow scraping surface of soft material. Precisely this narrow surface ensures an effective and pleasant use.

### Bacteria are the cause

A Tongue Cleaner or tongue scraper is by far the best and cheapest oral care tool for anyone who values fresh breath. Bacteria in the mouth and especially on the tongue are the cause. These bacteria convert waste into smelly breath. Most bacteria are located on the back of the tongue. Contrary to what is often thought, bad breath develops on the tongue and only to a negligible degree in the stomach. If it comes (long-term) from the stomach, consult your doctor.

### Cheapest oral care tool

In Europe tongue cleaners or tongue scrapers are hardly used. While tongue cleaning, in many other countries such as the US, is just as normal as brushing teeth. You do not have to leave it for the costs. A one-time purchase of less than 2 Euro for a tongue cleaner gives you fresh breath for the rest of your life.

### Benefits Tongue cleaner

It has been proven that scraping the tongue, when it comes to fresh breath, is many times more effective than tongue-brushing or chewing gum. In addition, the tongue cleaner offers other advantages. By scraping the tongue, you get an improved taste and you are better protected against respiratory infections. Tongue scraping works preventively against caries and reduces snoring partially and often completely.

### Use IQ Tongue Cleaner

Rinse and gargle the mouth and throat with water. Scrape the tongue from the back to the front (most bacteria are at the back of tongue). Rinse and gargle again. Clean the tongue scraper. Brush your teeth afterwards.

### Top product

The manufacturer of the IQ tongue scraper is Lactona. Lactona is since 1933 a well known company of high quality oral care products. The IQ tongue cleaner has been developed in collaboration with Dental universities. The tongue scraper is narrow. This is more effective and convenient to use and prevents gagging quickly. The cleaner does not contain a wearable, unhygienic and hardly effective brush.
